

9-1-1 Telecommunicator Disability Awareness Training

Sunday March 4, 2018

8:00am-5:00pm

Hosted by the Missouri Public Safety Communications Conference

The Missouri Professional Training Partnership is pleased to partner with Niagara University, the Missouri Developmental Disabilities Council and the MPSCC on the First Responder Disability Awareness Training project. The program is designed for 9-1-1 telecommunicators and other dispatch personnel in the State of Missouri.

First Responder Disability Awareness Training helps to both sensitize and educate telecommunicators on how to effectively identify, address, and respond to various disabilities that they may encounter in the line of duty. The National Emergency Numbers Association (NENA) recognizes this program as the only comprehensive disability awareness training program for emergency telecommunicators.

Training materials and attendance are **FREE** for Missouri residents (out-of-state attendees are subject to a \$350.00 registration fee). This training is funded by a grant through the Missouri Developmental Disabilities Council.

We hope you consider participating in this important training. This course is certified through the Missouri Training Partnership for 8 hours of mandated continuing education credit. Attendees must attend the entire 8-hour course to receive any continuing education credit.

LEAD INSTRUCTOR: Kima Burnett
DATE: Sunday, March 4, 2018
HOURS: 8:00am-5:00pm (1hour break for lunch)
